

INVESTOR OFFERING · BUILD & DEVELOPMENT PACKAGE

One record shop. Five sales channels. One build.

A complete public storefront, a unified back office, an in-store POS, and marketplace sync across Discogs, Tokopedia and Shopee — proposed as a single, indivisible package for the Medium Format build.

ALL-INCLUSIVE BUILD FEE

IDR 120,000,000

Retainer / hosting excluded · One-time · Package pricing

PREPARED FOR

Investors, Medium
Format

Jakarta · Independent record
shop

ISSUED

10 Jul 2026

Valid through 09 Aug 2026

What's inside the build. Every module. Every channel.

6 MODULES · 40+ FEATURES

The build ships as one system across public storefront, admin back office, in-store POS, marketplace channels, marketing and reporting. Each module is priced only as part of the package.

01 Public Storefront

Website

Common-ground-inspired dark storefront tuned for Jakarta buyers.

- Homepage & journal
- Release detail + tracklist
- Cart & guest checkout
- Biteship shipping quotes
- Shop / release browser
- Track previews (Apple / YT / Bandcamp)
- Xendit payments (QRIS, VA, cards)
- Customer accounts & wantlist

02 Admin Back Office

Ops

Single dashboard operating catalog, inventory, orders and staff roles.

- Dashboard & live KPIs
- Inventory & variants
- Customers & wantlist CRM
- Unified messages inbox
- Catalog + Discogs import
- Unified order pipeline
- News / journal CMS
- 5 roles (Admin / Staff / Shopkeeper / Wholesaler / Customer)

03 POS & In-Store

Tablet

Same catalog, same stock, same customer records — usable from the counter.

- Tablet web POS
- Label & receipt printing
- Walk-in customer capture
- Barcode scanning
- Cash + Xendit terminal
- Shift & drawer reports

04 Marketplace Channels

Sync

One inventory pushed & reconciled across every marketplace.

- Discogs Marketplace
- Shopee
- Webhook order intake
- Tokopedia
- Website + POS
- Per-channel pricing

05 Marketing & Newsletter

AI-assisted

Owned audience. Listmonk-driven newsletter with OpenRouter copy assist.

- Listmonk newsletter
- Promo & discount codes
- Automated new-arrivals digest
- AI copy assist (OpenRouter)
- Segments & sign-up forms
- Wholesale role & pricing

06 Reports & Settings

Insight

Actionable reports and the boring plumbing that makes it all legal.

- Sales report
- Channel profitability
- Store, users, integrations
- Inventory report
- Tax report (PPN 11%)
- Payments & shipping settings

07 Foundations included in every module

Included

- Next.js 15
- TypeScript
- Tailwind v4
- PostgreSQL 16
- Prisma 5
- Auth.js v5
- BullMQ + Redis
- Xendit
- Biteship
- Listmonk
- OpenRouter AI
- Discogs API
- Apple Music
- YouTube
- Docker Compose
- nginx + Let's Encrypt
- Cloudflare DNS
- Monochrome v2.0 design system

Why one package. Not six line items.

PACKAGE · INDIVISIBLE

The modules aren't independent products — they share one database, one auth layer, one design system and one build. Split them and the shop stops being a shop. The offering is priced accordingly.

A shop needs to sell everywhere at once from one truth of stock. Pull any module and something visible to the buyer breaks.

PACKAGE THESIS · MEDIUM FORMAT BUILD

01 · COMPOUNDING VALUE

Every module lifts the others

POS sales top up marketplace stock in real time. Newsletters promote new arrivals from the same catalog. Reports read every channel. Value grows with each connection, not in isolation.

02 · ONE CODEBASE

Shared foundations, priced once

Auth, roles, data model, design tokens, jobs queue and deploy pipeline are built once and reused six times. Splitting the package doesn't save money — it duplicates the foundation.

03 · ONE TRUTH OF STOCK

Stock isn't a feature — it's the axis

Every module reads & writes the same inventory. Selling from POS while Tokopedia is offline, or missing a wantlist, is a business failure — not a de-scope.

// IF YOU UNBUNDLE · WHAT BREAKS

Skip POS SPLIT STOCK	In-store sales stop decrementing website stock. Online shoppers buy records that were sold at the counter an hour earlier. Chargebacks and refunds follow.
Skip Newsletter RENT YOUR AUDIENCE	You keep paying Meta and Tokopedia to reach buyers you've already converted. First-party newsletter is the only channel that survives platform pricing changes.
Skip Marketplaces MISS 60% OF DEMAND	Indonesian vinyl demand lives on Tokopedia, Shopee and Discogs. Website-only means a store that only serves the buyers who already know the brand.
Skip Reports FLY BLIND ON TAX	PPN 11% and channel profitability aren't optional — they decide which titles you re-order. Without unified reports, restocking becomes guesswork.
Skip Back Office MANUAL EVERYTHING	Every order, message, and label goes back to spreadsheets and screenshots. Staff cost balloons faster than the software you declined to build.

One price. All-inclusive build.

FIXED · ONE-TIME

TOTAL BUILD & DEVELOPMENT

IDR **120,000,000** / project

Fixed price for the entire package as scoped on pages 02–03. Payable across milestones. Retainer, hosting and third-party service fees are excluded and quoted separately.
