

INVESTOR OFFERING · BUILD · RETAINER · ADD-ONS

One record shop. Five sales channels. Priced feature by feature.

A complete public storefront, a unified back office, an in-store POS, marketplace sync across Discogs, Tokopedia and Shopee, marketing and reports. Each feature is a line item — with its own timeline, its own price, and its own cost of being skipped.

PREPARED FOR

Investors, Medium Format
Jakarta · Independent record shop

CONTENTS

5 sections · 7 features
Build · Retainer · Subscriptions · Add-ons

ISSUED

10 Jul 2026
Valid through 09 Aug 2026

What's inside the build. Every module. Every channel.

7 FEATURES · 40+ DELIVERABLES

The build ships as seven features across public storefront, admin back office, in-store POS, marketplace channels, marketing and reporting. Pricing per feature is on page 03; skip-costs are baked into each row.

01 Foundations & Deploy

Required

Framework, database, auth, jobs, design system and deploy pipeline. Nothing else runs without this.

- Next.js 15 + TypeScript
- PostgreSQL 16 + Prisma 5
- Auth.js v5 · 5 roles
- BullMQ + Redis workers
- Monochrome v2.0 tokens
- Docker Compose + nginx + TLS

02 Public Storefront

Website

Common-ground-inspired dark storefront tuned for Jakarta buyers.

- Homepage & journal
- Shop / release browser
- Release detail + tracklist
- Track previews (Apple / YT / Bandcamp)
- Cart & guest checkout
- Xendit payments (QRIS, VA, cards)
- Biteship shipping quotes
- Customer accounts & wantlist

03 Admin Back Office

Ops

Single dashboard operating catalog, inventory, orders and staff roles.

- Dashboard & live KPIs
- Catalog + Discogs import
- Inventory & variants
- Unified order pipeline
- Customers & wantlist CRM
- News / journal CMS
- Unified messages inbox
- Users, roles, permissions

04 POS & In-Store

Tablet

Same catalog, same stock, same customer records — usable from the counter.

- Tablet web POS
- Barcode scanning
- Label & receipt printing
- Cash + Xendit terminal
- Walk-in customer capture
- Shift & drawer reports

05 Marketplace Sync

3 Channels

One inventory pushed & reconciled across every marketplace.

- Discogs Marketplace
- Tokopedia
- Shopee
- Webhook order intake
- Per-channel pricing
- Sync health monitoring

06 Marketing & Newsletter

AI-assisted

Owned audience. Listmonk-driven newsletter with OpenRouter copy assist.

- Listmonk newsletter
- AI copy assist (OpenRouter)
- Promo & discount codes
- Segments & sign-up forms
- Automated new-arrivals digest
- Wholesale role & pricing

07 Reports & Settings

Insight

Actionable reports and the boring plumbing that makes it all legal.

- Sales report
- Inventory report
- Channel profitability
- Tax report (PPN 11%)
- Store profile
- Payments & shipping
- Integrations config
- Backup & audit log

Priced by feature. Skip-cost included.

FIXED PRICE • ONE-TIME BUILD

Every feature carries its own timeline and its own line item. The right column names what breaks if the feature is dropped — the reason each one belongs in the package.

#	FEATURE	TIMELINE	PRICE	IF YOU SKIP
01	Foundations & Deploy Next.js 15 · Postgres · Prisma · Auth.js · BullMQ · Docker · nginx · Let's Encrypt.	2 WEEKS	IDR 18,000,000	✗ No app runs. This is the base — cannot be dropped.
02	Public Storefront Homepage, shop, release detail, previews, cart, checkout, accounts, wantlist.	5 WEEKS	IDR 22,000,000	✗ No online store. No cart, no checkout, no direct-to-buyer channel.
03	Admin Back Office Dashboard, catalog, inventory, orders, customers, messages, news, roles.	5 WEEKS	IDR 24,000,000	✗ Ops moves back to spreadsheets. Every order becomes manual. Staff cost explodes.
04	POS & In-Store Tablet POS, barcode scan, label & receipt print, cash + Xendit, shift reports.	3 WEEKS	IDR 14,000,000	✗ Counter sales don't touch online stock. Oversells, chargebacks, refund queue.
05	Marketplace Sync Discogs · Tokopedia · Shopee. Listings, orders, webhooks, per-channel pricing.	6 WEEKS	IDR 20,000,000	✗ Miss ~60% of Indonesian vinyl demand. Every marketplace goes dark.
06	Marketing & Newsletter Listmonk · OpenRouter AI copy · promos · segments · wholesale pricing.	4 WEEKS	IDR 12,000,000	✗ Rent your audience forever. Meta & Tokopedia set your CAC.
07	Reports & Settings Sales, inventory, channel profitability, PPN 11% tax, integrations, audit log.	3 WEEKS	IDR 10,000,000	✗ Fly blind on tax and restocking. Guessing which titles to re-order.
	TOTAL BUILD & DEVELOPMENT	18 WK	IDR 120,000,000	PACKAGE PRICE

// Timelines run partially in parallel – total wall-clock delivery is 18 weeks, not the 28-week sum of feature weeks. Payment schedule & milestones on page 05.

The store keeps running. Monthly retainer & infra.

MONTHLY · POST-LAUNCH

The build hands over on week 18. From week 19 onwards a monthly retainer keeps the software alive; a separate line of pass-through subscriptions keeps the servers, email and AI running.

TIER A · ESSENTIAL

Keep the lights on

IDR 8,000,000 / month

For steady-state operation, no active feature work.

INCLUDED

- ✓ Bug fixes for build defects
- ✓ Security patches (Node, Next, Postgres)
- ✓ Weekly dependency updates
- ✓ Daily backup verification
- ✓ Uptime + error monitoring
- ✓ Next-business-day SLA
- ✓ Monthly ops report
- New features & design changes

TIER B · STANDARD

RECOMMENDED

Actively evolving

IDR 15,000,000 / month

For a store that keeps releasing small improvements.

EVERYTHING IN ESSENTIAL, PLUS

- ✓ 8 hours / month feature work
- ✓ Same-business-day SLA
- ✓ Quarterly performance review
- ✓ Feature backlog managed
- ✓ Managed marketplace rule tuning
- ✓ 1× marketing campaign build / mo
- ✓ Rollover of 4 unused hours

TIER C · GROWTH

Actively scaling

IDR 28,000,000 / month

For rapid expansion & launch cycles.

EVERYTHING IN STANDARD, PLUS

- ✓ 20 hours / month feature work
- ✓ 4-hour SLA, business hours
- ✓ Weekly 1-hour office hours
- ✓ Priority queue for change requests
- ✓ On-call for launches & campaigns
- ✓ Dedicated Slack channel
- ✓ Rollover of 8 unused hours

Monthly pass-through subscriptions		PAID TO THIRD PARTIES · NOT TO BUILD TEAM
VPS · 4 vCPU / 8 GB	Contabo / Hetzner / Vultr class · runs app, worker, Postgres, Redis, Listmonk, nginx.	IDR 800,000
Domain (.id, annualised)	medium-format.id registration & renewal, amortised monthly.	IDR 25,000
Cloudflare DNS	DNS, CDN, TLS proxy — free tier is sufficient for launch traffic.	Free
SMTP (AWS SES / MailerSend)	Newsletter & transactional email · up to ~10k emails / month.	IDR 400,000
OpenRouter AI budget	Newsletter copy assist & content drafting · soft cap, top-up as needed.	IDR 500,000
Object storage (backups)	Cloudflare R2 or Backblaze B2 · 50 GB nightly Postgres + media backups.	IDR 150,000
Uptime monitoring	BetterStack / Uptime Kuma paid · 1-min checks + status page.	IDR 200,000
Xendit · Biteship · Discogs	Payments, shipping, marketplace APIs — no monthly, transaction fees only.	Variable
FIXED MONTHLY INFRA		IDR 2,075,000 / month

// Transaction fees (Xendit ~2.9% cards / ~0.7% QRIS; Biteship per shipment) scale with sales volume and are not part of fixed monthly cost.

Changing the shop later. Rate card & milestones.

RATE CARD · FIXED PRICING

Post-launch add-ons, modifications and new integrations are priced against this rate card. Time & materials work is billed hourly. Anything in the retainer's included hours is free at time of use.

Change requests · Fixed price	PER ITEM	Time & materials · Hourly	AD HOC
Copy or style tweak < 2 hours · text, colour, spacing	IDR 500,000	Standard hour Business hours (09–18 WIB)	IDR 750,000 / hr
Small feature 0.5–1 day · single screen or field	IDR 3,500,000	After-hours hour 18–24 WIB weekdays · weekends	IDR 1,125,000 / hr
Medium feature 2–5 days · new flow or report	IDR 12,000,000	Emergency call-out < 2 hr response · site down	IDR 1,500,000 / hr
Large feature 1–3 weeks · new module	IDR 35,000,000	Bug fix Build defect, in-warranty (12 months)	Free
New marketplace integration e.g. Bukalapak, Lazada, TikTok Shop	IDR 25,000,000	Retainer-included hours Tier B: 8 hrs / mo · Tier C: 20 hrs / mo	Free
Design revision Per round of art direction	IDR 2,000,000	Training session Staff onboarding · 2 hr block	IDR 2,500,000

// DELIVERY MILESTONES · PAYMENT TIED TO PHASE ACCEPTANCE

M1 · 25% Foundations + MVP-1 Weeks 1–6 IDR 30,000,000 Auth, catalog, inventory, orders, storefront, cart, Xendit, news, previews.	M2 · 25% MVP-2 Weeks 7–11 IDR 30,000,000 POS, barcode, label print, Discogs marketplace, customers, wantlist, messages.	M3 · 25% MVP-3 Weeks 12–15 IDR 30,000,000 Tokopedia, newsletter (Listmonk + OpenRouter), reports.	M4 · 25% MVP-4 + Handover Weeks 16–18 IDR 30,000,000 Shopee, wholesale role & pricing, advanced reports, training & handover.
